

The SharePoint Journey:

Past, Present, & Future of Microsoft SharePoint

Tuesday, June 6, 2017

7:30am – 8:30am
(Delhi / Mumbai)

AIIM India is pleased to host our annual SharePoint review, including the newest features announced in 2017 for SharePoint Server 2016 and SharePoint Online in Office 365. Mr. Owen Allen (@owenallen), Office 365 Technology Specialist at the Microsoft Corporation in Redmond Washington will review the foundation, current features, and recently announced future design plans for the Microsoft SharePoint environment.

Specific features that Owen will examine include the new, updated look and feel of SharePoint, publications capability, updated workflow ability, and embedded data governance parameters such as security, data loss prevention, and E-Discovery, as well as a cover of the SharePoint roadmap that will be announced by Microsoft in the May 16th SharePoint Virtual Summit (<https://aka.ms/lh68q6>).

Mr. Allen will also highlight specific use cases of SharePoint, where the focused deployment of SharePoint led to quantum increases in productivity and user efficiency across industry verticals. Integration and deployment strategies in order to optimize the productivity gains will be included in the program.

The SharePoint review continues the AIIM India Chapter track record of educational and informative virtual meetings. The event is open to all AIIM India members, as well as chapter affiliates located through the AIIM Asia Pacific region.

Location: **Via Virtual Member Meeting**

Date: **Tuesday June 6, 2017**
